Driving the Future of Automotive Retail - Together

7-9 October 2025

Daily Live Broadcast: 14:15–16:45 SGT

Accessible in Europe (08:15 CEST) and Australia (17:15 AEDT)

#TSAD2025

Fredy Tanduary
CEO | Technosoft Automotive

“This event is more than just a platform to present our work — it’s a celebration of innovation, collaboration, and the evolving landscape of automotive retail.”

Welcome to Technosoft Automotive Days 2025!!

The automotive industry is experiencing a once-in-a-century transformation. Electrification, connected technologies, sustainability, and the evolution of AI are fundamentally reshaping the industry.

This event brings together leaders, innovators, customers, and partners from Asia-Pacific, Oceania, and EMEA to share practical business applications, customer success stories, and the essence of strategic partnerships.

Hosted annually by Technosoft Automotive’s Singapore headquarters, this global online event is your opportunity to experience the intersection of technology and people. Together with partners like Microsoft, we deliver solutions that support the future of the industry.

We hope this event will be a chance to revisit the value created where technology and people meet, by listening to voices from the field.

We look forward to your participation.

About the Event

Dennis de Jesus
Event MC
Technosoft Automotive

Technosoft Automotive Days 2025 is a global online event uniting leaders, innovators, customers, and partners driving the automotive industry from Asia-Pacific, Oceania, and EMEA.

Over three days, we will explore the challenges facing the automotive industry, cutting-edge IT technologies, successful system implementation projects, and collaborative initiatives.

This event is open to all—automotive manufacturers, dealers, IT vendors, industry consultants, and more.

It is a unique opportunity to network with peers, gain practical insights, and experience firsthand how digital technology is transforming the entire automotive value chain.

Disclaimer:

Speakers, session titles, and content are subject to change without notice.

The views and opinions expressed by individual speakers are their own and do not necessarily reflect those of their respective organizations.

Event Key Takeaways

Real-World Implementation Stories

Learn how leading companies have achieved success with Technosoft Automotive Solution.

Latest Product Updates & Roadmap

Hear directly from the product development team about new versions and future plans.

AI & Copilot Best Practices

Discover practical applications of AI and Copilot in customer experience, business improvement, and decision support.

Glocalization in Practice

Understand how to balance global standardization and local optimization, and the importance of partnerships.

Dialogue with Industry Leaders

Gain strategic perspectives and real-world experiences from CIOs and executives leading digital transformation.

Networking & Collaboration Opportunities

Expand your business possibilities through interactions with peers and partner companies.

Event Highlights

Day 1 – The Future of Automotive Retail

Keynote by Technosoft CEO Fredy Tan (30 min)

Fredy Tan will explore how AI, Copilot, and digital platforms are transforming customer engagement, operational efficiency, and global scalability in the automotive industry.

Fireside Chat with the CIO of Plaza Capital Automotive Division

Plaza Capital is a diversified investment group in Indonesia, active in automotive, energy, and real estate development. With over 30 dealerships in Jakarta, Surabaya, Bandung, and Batam, Plaza Capital represents world-renowned brands such as Toyota, Subaru, MINI, BMW, and Harley-Davidson. Through its subsidiary, Kreasi Semesta Group, the company has also entered automotive manufacturing and aftermarket services, supplying high-quality products to OEMs under brands like Otogard and EVO.

Plaza Capital has taken a bold step toward digital transformation by leveraging AI in vehicle sales. While details remain confidential, the adoption of Technosoft Automotive Solution Yana AI platform demonstrates a strong commitment to innovation and data-driven operations. This session will dive deeper into these themes.

Live Demo Session: Solving Dealership Challenges with Technosoft Automotive Solution (30 min)

This session will address key business and system challenges faced by dealerships and showcase how our solutions help customers overcome them.

Product Development Team Session: Introducing the Latest Version of Technosoft Automotive Solution /Yana DMS (60 min)

Discover the newest features of Technosoft Automotive Solution, including Copilot and AI enhancements, presented by our product development team.

Opening Keynote

Day 1 – Reimagining Automotive Retail

Fredy Tanduary
CEO | Technosoft Automotive

Session Title :

「Empowering Dealers, Elevating Experiences with AI: Plaza Capital’s Challenge and Vision」

In this forward-looking keynote, Fredy Tan explores how AI, Copilot, and digital platforms are revolutionizing customer engagement, operational efficiency, and global scalability across the automotive industry.

Special Session with Plaza Capital CIO

This session welcomes the Chief Information Officer of Plaza Capital as a special guest to share the journey behind their decision to adopt AI and their future outlook following the implementation of Technosoft Automotive Solution.

Plaza Capital operates dealerships for multiple brands, including Toyota, Subaru, BMW, MINI, and Harley-Davidson.

Join us to discover how their bold approach to digital transformation and AI utilization is creating new value in the automotive sector.

Special Guest

Day 1 – Reimagining Automotive Retail

Aulvin Basyir

Chief Information Officer |
Plaza Capital

Fireside Chat with the Automotive Sector CIO of Plaza Capital

Plaza Capital is a diversified Indonesian investment group active in automotive, energy, and property development. With over 30 dealership outlets across Jakarta, Surabaya, Bandung, and Batam, the group represents globally renowned brands including Toyota, Subaru, MINI, BMW, and Harley-Davidson. Through its subsidiary Kreasi Semesta Group, Plaza Capital also engages in automotive manufacturing and aftermarket services, supplying OEMs with high-quality products under brands like Otogard and EVO.

Plaza Capital has recently begun its journey into AI-powered automotive retail, marking a bold step toward digital transformation. While details remain confidential, their adoption of Technosoft's Yana AI platform signals a strong commitment to innovation and data-driven excellence — a topic that will be explored during the session.

What is Technosoft Yana Automotive Solution?

Day 1 – Reimagining Automotive Retail

Phorn Adams

Sales Director – ANZ |
Technosoft Automotive

Novell Chow

Presales MGR |
Technosoft Automotive

Live Demo Session:

「Solving Dealership Challenges with Technosoft Automotive Solution」

Session Overview:

In this live demonstration, Phorn Adams (Sales Director – Australia/New Zealand) and Novell Chow (Presales Manager) from Technosoft Automotive will showcase how Yana DMS addresses key challenges faced by automotive dealerships.

Through a hands-on demo, they will present practical solutions to common business and system issues.

This session is especially valuable for:

- Dealerships using DMS but struggling to meet evolving business needs,
- OEM distributors seeking timely information collection from their dealer networks,
- IT vendors involved in the development and implementation of DMS or distributor systems.

Join us to discover how Technosoft Automotive Solution, Yana DMS can help drive operational excellence and business growth.

Where is Technosoft Yana Automotive Solution heading?

Day 1 – Reimagining Automotive Retail

Dyainal Halim
VP of R&D |
Technosoft Automotive

Henry Salim
General Manager |
Technosoft Automotive

Chandra Karanina
DMS Product Owner |
Technosoft Automotive

Product Development Team Session:

「Introducing the Latest Features of Technosoft Automotive Solution/Yana DMS」

Session Overview:

In this session, Technosoft product development team will present the latest features and enhancements in the newest version of the Dealer Management System (DMS).

The update focuses on real-world usability, including improved user experience based on customer feedback, deeper integration with AI and Copilot, expanded global capabilities, and greater efficiency in sales and service operations.

This session offers valuable insights for both current users of Technosoft Automotive Solution and those considering system implementation.

Day 2 – Voices from the Field: Customer Success Stories

On Day 2, OEMs who have implemented Technosoft Automotive Solution will take the stage to share their experiences.

Nissan Philippines Inc. (30 min)

Nissan Philippines has adopted Technosoft Automotive Solution Yana—including DMS, NSC, and digital marketing systems—enabling timely and effective data utilization.

This session is ideal for those interested in the benefits of building systems on Microsoft technologies.

Toyota Laos Co., Ltd. & Toyota Tsusho Asia Pacific Pte. Ltd. (30 min)

Toyota Laos has completed the implementation of distributor and DMS systems for new vehicle sales and is now moving forward with the development and rollout of aftersales modules for dealerships.

This session is recommended for those considering a phased approach to system implementation across business functions.

General Motors Australia & New Zealand | General Motors Europe (60 min)

GM's Australia and New Zealand operations have successfully implemented Technosoft DMS and are now expanding the solution to their European locations. The system is already live across multiple European sites.

If you're interested in global DMS deployment strategies, this session offers valuable insights into multi-region implementation.

Day 2 – Voices from the Field

Real-world success stories from leading OEMs and automotive brands:

Full-Scale System Implementation Using Microsoft Technologies

Paul Cruz

General Manager, IS/IT |
Nissan Philippines Inc.

Kensuke Okino

ASEAN IS/IT Head |
Nissan Motor (Thailand) Co., LTD.

Rainier Familiaran

Philippines Sales Director |
Technosoft Automotive

Lily Septiana

Consulting Service |
Technosoft Automotive

Case Study Session Title:

「Empowering the Frontline through Visualization: Nissan Philippines Shares Insights on Yana Implementation and Future Strategy」

Session Overview:

Paul Cruz (General Manager IS/IT, Nissan Philippines Inc.), Kensuke Okino (ASEAN IS/IT Head, Nissan Thailand Inc.), Rainier (Sales Director, Technosoft Automotive Philippines), and Lily (General Manager, Consulting Service, Technosoft Automotive) will take the stage to reflect on the implementation of Technosoft Automotive Solution—including DMS, NSC system, and digital marketing platform—at Nissan Philippines Inc.

What's the next move for Nissan Philippines, now that they've achieved timely and effective data utilization?

Join us to explore their journey and future vision.

Day 2 – Voices from the Field

Real-world success stories from leading OEMs and automotive brands:

Implementing System Modules in Phases

Joey Lam

Project Manager |
Toyota Tsusho Asia Pacific Pte. Ltd.

Kai Manikham

IT System Manager |
Toyota Laos Co., Ltd.

Joe Goh

VP of Sales |
Technosoft Automotive

Gilbert Wong

Senior Project Manager |
Technosoft Automotive

Case Study Session Title:

「Driving Success Through Challenge/Toyota Laos and Toyota Tsusho Asia on Yana Implementation and What's Next ? 」

Session Overview:

Joey Lam (Project Manager, TOYOTA TSUSHO Asia Pacific Pte. Ltd.), Kai Manikham (IT System Manager, Toyota Laos Co., Ltd.), Gilbert Wong (Senior Project Manager, Technosoft Automotive), and Joe Goh (VP of Sales, Technosoft Automotive) will share the behind-the-scenes story of digital transformation at Toyota Laos.

This session will reflect on the implementation of the NSC system and DMS for new vehicle sales, highlighting key milestones, challenges overcome, and the resulting business impact. The speakers will also provide insights into future initiatives and next steps in their transformation journey.

Day 2 – Voices from the Field

Real-world success stories from leading OEMs and automotive brands:

Expanding a System Built in ANZ to Europe – A Multi-Country Implementation Journey

Ben Cowan

General Manager |
General Motors–ANZ

Alexandre Helenport

Chief Information Officer |
General Motors Europe

Phorn Adams

Sales Director – ANZ |
Technosoft Automotive

Maximilian Straub

Sales Manager Germany |
Technosoft Automotive

Case Study Session Title:

「Leading the D2C Revolution/ GM's Expansion from ANZ to Europe and Yana Implementation Insights」

Session Overview:

Ben Cowan (General Motors – ANZ/GM) and Alex Helenport (CIO, General Motors – Europe) will join Phorn Adams (Sales Director – ANZ, Technosoft Automotive) and Maximilian Straub (Sales Manager – Germany, Technosoft Automotive) for a panel discussion on GM's direct-to-consumer (D2C) system strategy.

The session will explore the successful system implementation in Australia and New Zealand, and its ongoing expansion across multiple European countries. Learn how GM is driving digital transformation through a unified global platform.

Day 3 – Where Technology and People Intersect: Real-World Impact and Future Outlook from Customers, Partners, and Software Company

On the third day, a discussion will be held with product developers, implementation partners, and user companies on two key themes: the “glocal” approach created by the synergy of technology and people that is essential for multinational system deployment, and the unique “ role of humans ” in the age of AI.

Microsoft Session : Microsoft Germany (30 min)

Microsoft Germany will present case studies of Microsoft technology adoption by German OEMs. The session will also highlight the latest AI capabilities in Microsoft’s business applications, time permitting.

Leadership Session : Abdul Latif Jameel (30 min)

Operating across the Middle East, North Africa, and Europe, Abdul Latif Jameel will share how they are addressing digital transformation and diversity challenges.

Through a panel discussion with Technosoft, the CIO will present their vision for innovation and inclusive growth.

Business Alliance Session :EMEA Microsoft Business Application Partners (60 min)

Partners specializing in Microsoft Dynamics 365 and Power Platform will join a panel discussion on key success factors in deploying, developing, and scaling Technosoft Automotive Solution across regions.

Day 3 – Where Technology and People Intersect: Real-World Impact and Future Outlook from Customers, Partners, and Software Company

Microsoft Session

Achim Löschner

Sr. Solution Engineer- Dynamics 365 |
Microsoft Germany

Microsoft Session Title:

「Driving the Future with AI and People— Microsoft’s Vision for Automotive Innovation and Connection」

Session Overview:

In this session, a guest speaker from Microsoft Germany with deep expertise in the automotive industry will present real-world case studies of Microsoft technology adoption by German OEMs.

The session will also highlight the latest AI and Copilot capabilities within Microsoft’s business applications.

This is a unique opportunity to learn directly from a technology leader at the forefront of industry transformation.

Day 3 – Where Technology and People Intersect: Real-World Impact and Future Outlook from Customers, Partners, and Software Company

Exploring Mobility, Empowering People, Creating Value, and Driving Vision Across Regions

Leyla Delic

Chief Information & Digital Officer |
Abdul Latif Jameel

Gunkut Ayvazoglu

EMEA Sales Director |
Technosoft Automotive

Nizar Bakadir

Sales Manager EMEA |
Technosoft Automotive

Leadership Session Title:

「Co-Creating a Sustainable Future with Technology and People — In Conversation with Abdul Latif Jameel」

Session Overview:

This session will feature the Chief Information Officer of Abdul Latif Jameel (ALJ), who will share the company's global approach to mobility transformation through the lens of where technology and humanity intersect. The conversation will revolve around ALJ's four foundational pillars: redefining mobility across regions, empowering individuals and communities, creating sustainable and data-driven value, and envisioning a future shaped by both technological innovation and human insight.

By examining real-world implementations, tangible outcomes, and future directions, the session will offer a deep understanding of how ALJ is addressing the complex challenges faced by global enterprises. It will also provide valuable perspectives on how people and technology can collaborate to build a more inclusive and forward-looking future.

Day 3 – Where Technology and People Intersect: Real-World Impact and Future Outlook from Customers, Partners, and Software Company

Roundtable Discussion with EMEA Microsoft Business Application Partners

Imran Bin Naeem

CEO
Dynamics Solutions & Technology

Christophe Chaise

Automotive Industry Expert |
Carya

Gunkut Ayvazoglu

EMEA Sales Director |
Technosoft Automotive

Maximilian Straub

Sales Manager Germany |
Technosoft Automotive

Partner Session Title:

「Building a Valuable Future Together, Technosoft and Microsoft EMEA Partners on Human–Technology Synergy」

Session Overview:

In this session, Gunkut (EMEA Sales Director, Technosoft Automotive) and Maximilian Straub (Sales Manager – Germany, Technosoft Automotive) will host a roundtable discussion with leading Microsoft Business Application partners from the EMEA region.

The conversation will explore why these partners chose to collaborate with Technosoft Automotive Solution, and the unique value they deliver to customers through this partnership. As AI becomes a buzzword, this session also dives into a critical question: “What is the role of human expertise in driving meaningful transformation?”

Don't miss this opportunity to hear directly from those shaping the future of automotive technology.

AI and Copilot in the Automotive Industry

AI and Copilot are fundamentally transforming the way work is done in the automotive industry.

From sales and service to inventory management and customer engagement, AI analyzes vast amounts of data to support more accurate decision-making. Copilot functions as a “digital assistant,” instantly providing frontline staff with the information they need and guiding workflows smoothly. As a result, customer relationships are evolving to become deeper and more personalized, while operational efficiency is dramatically improving. For globally operating companies, this also enables flexible responses to regional needs while maintaining standardized processes. AI and Copilot are key to unlocking new value across the entire automotive value chain—through seamless collaboration between technology and people.

Glocalization

= Maintaining a global strategy while flexibly responding to local market needs and customs

= Creating value through the fusion of global and local perspectives

As markets become increasingly diverse, OEMs and dealers are required to balance global standards with local expectations.

Technosoft Automotive Solution provides a framework that ensures operational consistency and compliance, while flexibly adapting to the unique needs of each region.

At Technosoft Automotive Days 2025, Technosoft, regional partners, and customer organizations will take the stage to share practical approaches for achieving both standardization and local optimization. Together, they will explore the value created through collaboration and co-creation and discuss the keys to successful system implementation projects.

Future-Ready Workstyles: Aligning with the Needs of a New Era

In countries facing a declining labor force, achieving more with less is becoming essential. While setting clear priorities is important, leveraging IT effectively is increasingly critical to empower employees. Microsoft and its partners are actively addressing this challenge by providing solutions that enhance productivity, streamline operations, and support human-centric innovation. At the same time, user organizations are making significant efforts to adapt—by rethinking workflows, investing in digital tools, and fostering a culture of empowerment.

This topic will also be featured in this event, highlighting practical approaches and real-world examples from both technology providers and user enterprises.

A Heartfelt Thank You to Our Participants

「Our business began in the ASEAN region and has steadily expanded in recent years to Oceania (Australia and New Zealand), East Asia, Central Asia, and the EMEA region (Europe, the Middle East, and Africa), where we are now driving diverse projects across each market.

At last [year's Technosoft Automotive Days 2024](#), we welcomed participants from around the world and received highly positive feedback. Building on that input, this year's event is designed to offer even more opportunities for customers and partners to share their experiences.

At [Technosoft Automotive Days 2025](#), we will showcase how our initiatives—powered by Microsoft technologies—are being embedded into real-world operations in the automotive industry and delivering tangible results.

In an era where AI is in the spotlight, we believe it is more important than ever to reaffirm the principle that people must remain at the center. Through the wisdom and experience of those working on the ground, and through the connections we foster with our customers and partners, we aim to rediscover the true driving force behind meaningful transformation—human insight.

We sincerely hope this event will offer you new perspectives and valuable insights through practical case studies and thoughtful dialogue emerging from the intersection of people and technology.」
